

compile

Modern data backbone for life sciences

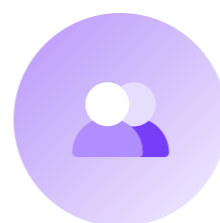

Product overview

Compile is the system of record for the U.S. Healthcare market, with intelligence on 2M+ healthcare professionals (HCPs), 800K+ facilities and 300M+ patient lives.

By transforming messy and disparate datasets into an intuitive graph of healthcare providers and patients, Compile enables commercial teams to move faster.

Our products, which include Enhanced Patient Data and Provider 360, provide a complete map of your target market. The data is also granular to provide a detailed view of provider activity.

Compile is your single source of healthcare intelligence with high-capture, high-fidelity data across providers and patients. Our customer-centric ethos is reflected in our simple licensing and responsive support.

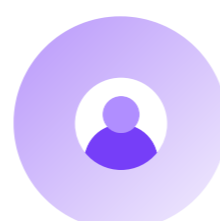

Find more providers, more patients

Compile's high-capture data assets provide visibility into HCPs, HCOs and patients, across all areas of care.

Take a patient, provider or account view

With affiliations embedded into the patient-level data, analyze your market at whichever level of granularity you need

Increase engagement through hyper targeting

Execute precise outreach with real-time and unique insights on every account in your market

Access insights on day one

With a user-friendly data model and multiple access mechanisms, get instant results

Spend zero time on data wrangling

Compile's data is cleansed, normalized and enriched, so you don't spend any time cleaning data errors imputing missing values and

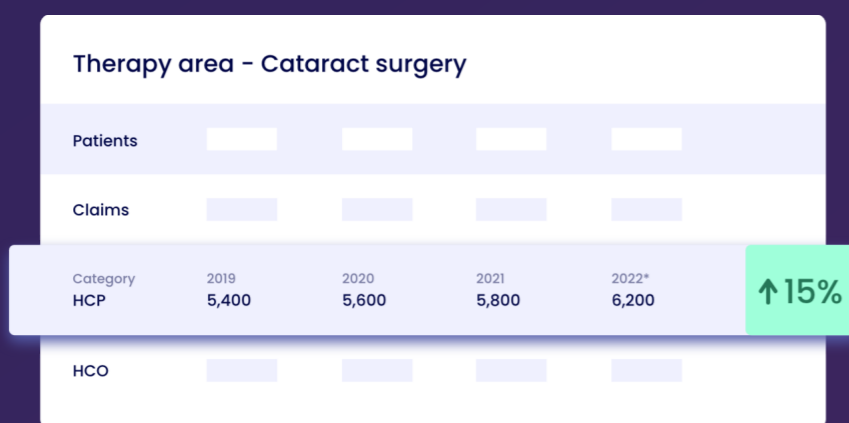

Your data, as you see fit

Get only the data you need; Compile's data model can scale-up or scale-down to your requirements

Healthcare is complex, we connect the dots

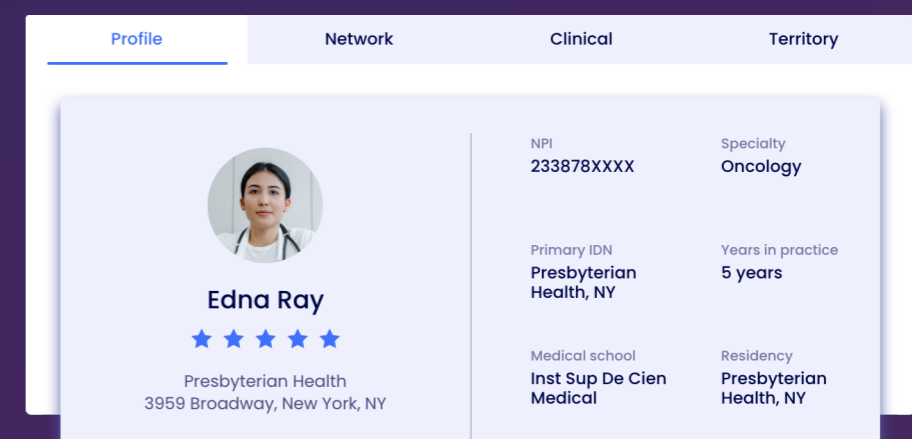

Data offerings

Enhanced Patient Data

- High-capture open claims (Medical, Retail Pharmacy, Specialty Pharmacy)
- 100% capture of Medicare data at patient-level
- Patient-linked EHR

Provider 360

- Best-in-class provider affiliations, including HCP, healthcare organizations (HCOs) and integrated delivery networks (IDNs)
- High-impact prescriber intelligence that goes beyond basic demographics
- Actionable insights on facilities, HCOs and IDNs for account-based sales

Commercial outcomes, amplified

INSIGHTS & ANALYTICS

Market overview

Get a complete view of your market

KOL identification

Identify and engage high-impact providers

HCP targeting

Grow your market, discover new accounts

Patient journey

Understand drivers of patients' treatment journey

MARKET ACCESS

IDN level of control

Customize your sales strategy based on account's behavior

Reimbursement analytics

Gain insights into payer

Payer dynamics

Understand the drivers of payer coverage decisions

Referral analysis

Uncover insights by tracing referral

SALES OPS

Sales attribution

Optimize your field force by accurately attributing sales

Account-based sales

Target your accounts with precision

Sales force efficiency

Prospect smarter, not harder

Call planning

Reach and engage your customers

COMMERCIAL MDM

Provider affiliations

Increase pipeline, discover new targets

Customer master

Compile's clean hierarchy reflects an account's actual structure

Data anywhere, anytime

With instant provisioning, user-friendly data structure and multiple access mechanisms: Compile's data platform enables life science teams accelerate data value
